Ms. Urva Patel
1641 Mail Service Center
N.C. Division of Air Quality
Raleigh, N.C. 27699

Subject: Tima Capital Title V Permit: Application No. 6500355.17A

Dear Ms. Patel:

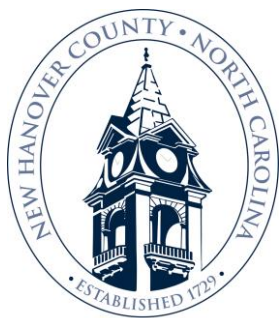

It is my understanding that the 30-day public comment period for this application is set to expire on March 25. I am writing today to ask that 1) the comment period be extended; and 2) that DEQ conduct a public information session in New Hanover County to address the permit request.

Members of our community are specifically interested in understanding if the increases in the use of methyl bromide proposed in the application would be harmful to air quality. While I recognize that such a public meeting is not required by law, it is something that many of our citizens have asked be conducted so that the community can be informed.

Thank you for your consideration.

Sincerely,

Woody White
Chairman
